### Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2012 Final Report

Date: September 17, 2018

Program or Project Title: RIM-WRP Partnership Program, Phase 4

Funds Recommended: \$13,810,000

Manager's Name: Kevin Lines

Organization: BWSR

Address: 520 Lafayette Road North

City: St. Paul, 55155

Office Number: 651-297-1894 Email: kevin.lines@state.mn.us

Legislative Citation: ML 2012, Ch. 264, Art. 1, Sec. 2, Subd. 4(a)

Appropriation Language: \$13,810,000 in the second year is to the Board of Water and Soil Resources to acquire permanent conservation easements and restore wetlands and associated upland habitat in cooperation with the United States Department of Agriculture Wetlands Reserve Program. A list of land acquisitions must be provided as part of the final report. The accomplishment plan must include an easement stewardship plan. Up to \$180,000 is for establishing a monitoring and enforcement fund as approved in the accomplishment plan and subject to Minnesota Statutes, section 97A.056, subdivision 17. An annual financial report is required for any monitoring and enforcement fund established, including expenditures from the fund and a description of annual monitoring and enforcement activities.

County Locations: Becker, Carver, Douglas, Freeborn, Le Sueur, Lincoln, Martin, Nobles, Norman, Pennington, Redwood, Rice, Sibley, Stearns, Stevens, West Ottertail, Wilkin, and Wright.

### Regions in which work was completed:

- Forest / Prairie Transition
- Prairie
- Metro / Urban

#### Activity types:

• Protect in Easement

### Priority resources addressed by activity:

- Wetlands
- Prairie

### **Summary of Accomplishments:**

Eight RIM Wetlands applications were selected for funding on 1146.2 acres from this appropriation. In addition 19 RIM-WRP easements, totaling 2,239 acres were funded. Thus a total of 3,385 acres were protected and restored to wetland and grassland habitat. All easements have been recorded. Leverage from other sources of funds was a little over \$4.5M.

### **Process & Methods:**

The RIM Wetlands and RIM-WRP Partnership accelerated the restoration and protection of 3,385 acres of previously drained wetlands and associated upland native grassland wildlife habitat complexes via permanent conservation easements. The goal of RIM Wetlands and the RIM-WRP Partnership was to achieve the greatest wetland functions and values, while optimizing wildlife habitat on every acre enrolled in the partnership.

The RIM-WRP partnership combined Minnesota's RIM Reserve conservation easement program and the United States Department of

Agriculture's (USDA) Natural Resources Conservation Service (NRCS) Wetlands Reserve Program (WRP). Combining RIM Reserve and WRP allowed OHF to leverage Federal Farm Bill conservation dollars to Minnesota. Utilizing both programs resulted in competitive payment rates to landowners and sharing of the costs associated with perpetual easement acquisition and restoration by both the federal and state programs. Unfortunately, circumstances beyond our control such as staffing and other issues at NRCS severely limited the agencies ability to close easements and implement restorations, and BWSR was obligated to restructure the RIM-WRP Partnership into RIM Wetlands in November of 2014. The inability of NRCS to follow through on commitments, dramatically increasing crop and land values and reduced federal leverage resulted in fewer acres being accomplished than originally proposed. These changes are reflected in the 11/18/14 Accomplishment Plan Amendment and testimony provided by BWSR staff at that time.

The RIM Wetlands Program and RIM-WRP Partnership held one to two joint meetings per year to provide program oversight and guidance and to establish payment rates for upcoming sign-ups. Specifically, both programs used the USFWS Habitat and Population Evaluation Team (HAPET), located in Fergus Falls, to develop a GIS Wildlife Habitat Potential Model that was used with the WRP and RIM Reserve programs' environmental evaluation. In addition, the Minnesota Wetland Restoration Evaluation Worksheet was used to evaluate each easement application on its potential to restore wetland functions and values along with optimum wildlife habitat benefits.

Both programs were offered statewide but had a priority focus in the ecological provinces of the state that have experienced significant losses of wetland and associated prairies. It was delivered by Ducks Unlimited (DU) staff, local NRCS staff, local Soil and Water Conservation District (SWCD) staff and assisted by program staff from both NRCS and the Board of Water and Soil Resources (BWSR). Since the SWCD is responsible for the local delivery of the RIM Reserve program to private landowners on behalf of the State of Minnesota, they were ideally suited to work in concert with their local DU and NRCS staff to efficiently and effectively deliver the RIM-WRP partnership. In the case of RIM-WRP once an easement is acquired NRCS is responsible for maintenance, inspection and monitoring during the life of their 30-year WRP easement. The state of Minnesota assumes sole responsibility via its RIM Reserve easement once the 30-year WRP easement has expired. For RIM Wetlands the state assumes responsibility for monitoring and enforcement as soon as the easement is recorded. BWSR partners with local SWCDs to carry-out oversight, monitoring and inspection of its conservation easements.

Throughout its history the RIM-WRP Partnership demonstrated that the State of Minnesota can cooperatively work with a federal partner (NRCS) and through a local delivery system (SWCD, NRCS, and DU) to implement a permanent easement protection program that yielded thousands of acres of permanently protected wildlife habitat. Significant leverage obtained was due to the amount of easement payments, conservation plan payments, and other costs the NRCS contributed to this partnership. The NRCS made the bulk of the easement payment portion through 30-year WRP Easement acquisition, while BWSR paid an additional portion for the Permanent RIM Easement. It is most unfortunate that this partnership had to end after conserving nearly 20,000 acres cumulatively.

NRCS paid a high percentage of the restoration costs for these easements, with RIM picking up the remaining costs. The use of NRCS Practice Standards, along with BWSR's Native Vegetation Guidelines led to very high diversity mixes being seeded. The level of wetland restoration was dependent on restorable extent that would not impact lands outside the easement area. BWSR & NRCS evaluated restoration extent during our scoring review to ensure restoration was actually feasible, then followed up with site analysis and surveys.

Eight RIM Wetlands applications were selected for funding on 1146.2 acres with this appropriation. In addition 19 RIM-WRP easements, totaling 2,239 acres were funded. These restored wetlands and native grassland complexes will provide critical habitat for migratory waterfowl and other wetland dependent wildlife species in Minnesota. Wetlands and adjacent grasslands provide habitat for waterfowl, pheasants, deer and non-game species, some that are threatened or endangered.

As of 8/21/18 9 easements have been restored and 17 are in the restoration process. BWSR and the NRCS are committed to seeing all restorations through to ensure all sites provide beneficial habitat. Due to delays with easement processing, restoration was also delayed in several cases. BWSR is held to the statutory requirement that requires restoration of the easements we acquire. This restoration includes establishment of acceptable vegetation, if the current cover does not adequately meet site goals.

Note that due to LSOHC database architecture and migration of this old project into the "new" LSOHC database amended goals are not reflected in the "original" budget and output columns of this final report.

### Explain Partners, Supporters, & Opposition:

Delivery of this program was a coordinated approach that brought together Minnesota BWSR, Minnesota NRCS, local Soil & Water Conservation Districts, Ducks Unlimited, and Farm Bill Assistance Partnership Staff, as well as other key conservation partners interested in private land conservation.

### **Additional Comments:**

Exceptional challenges, expectations, failures, opportunities, or unique aspects of program

A number of challenges affected this phase of RIM-WRP which ultimately led to re-tooling as RIM Wetlands. In addition, runaway land

and crop prices between the time this phase was proposed and it was implemented resulted in significantly fewer acres protected. Staffing and other issues at NRCS severely limited the agencies ability to close easements and implement restorations. As of this writing we are still dealing with the latter challenges but are making progress. All easements have been closed and 9 have been restored. The remainder are in the process of restoration. BWSR is fully committed to 100% restoration of high quality wetland and grassland habitat.

### Other Funds Received:

- Environmental and Natural Resource Trust Fund
- · Clean Water Fund

#### How were the funds used to advanced the program:

The RIM-WRP Partnership integrates with many other L-SOHC requests and previously funded projects such as Buffers for Wildlife which is funded 50% with Clean Water Funds. In addition, the Farm Bill Assistance Partnership with BWSR, DNR, PF and SWCD's pays for SWCD's to utilize technicians to promote the conservation provisions of the Federal Farm Bill and other conservation program opportunities to private landowners. Environmental and Natural Resources Trust Fund (ENRTF) funds via LCCMR recommendations were leveraged with this money.

# What is the plan to sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

Once a RIM easement is acquired, BWSR is responsible for monitoring and enforcement in perpetuity. The BWSR partners with local SWCDs to carry-out oversight, monitoring and inspection of its conservation easements. Easements are inspected for the first five consecutive years beginning in the year after the easement is recorded. Thereafter, on-site inspections are performed every three years and compliance checks are performed in the other two years. SWCDs report to BWSR on each site inspection conducted and partners' staff document findings. A non-compliance procedure is implemented when potential violations or problems are identified. The amount listed for Easement Stewardship covers a portion of costs of the SWCD regular monitoring, BWSR oversight, and enforcement.

#### **Outcomes:**

### The original accomplishment plan stated the program would

#### Programs in forest-prairie transition region:

- Improved aquatic habitat indicators
- Protected, restored, and enhanced nesting and migratory habitat for waterfowl, upland birds, and species of greatest conservation need
- The RIM-WRP Partnership will accelerate the protection and restoration of approximately 9,385 acres of previously drained wetlands and associated upland native grassland wildlife habitat complexes via permanent conservation easements. The goal of the RIM-WRP Partnership is to achieve the greatest wetland functions and values, while optimizing wildlife habitat on every acre enrolled in partnership.

#### How will the outcomes be measured and evaluated?

An increase of wetland and associated native grassland habitat availability within a certain region are expected to increase the carrying capacity of wetland-dependent and grassland-dependent wildlife within that region. This would have a positive impact on both game and nongame species. We expect more abundant populations of endangered, threatened, special concern and game species as these complexes are restored. Restored wetlands generally lead to an improvement in water quality in downstream receiving waters.

#### Programs in metropolitan urbanizing region:

- · A network of natural land and riparian habitats will connect corridors for wildlife and species in greatest conservation need
- The RIM-WRP Partnership enables Minnesota to leverage \$1.6 of Federal WRP funding for every state \$1 available through RIM Reserve. An appropriation of \$13.81 million from the Outdoor Heritage Fund (OHF) will leverage \$22 million in WRP Funds to Minnesotaâs wetland restoration efforts on private lands. In total, this is a \$36 million project through which we expect to enroll approximately 75 permanent conservation easements totaling 9,385 acres into 60 wetland and native grassland wildlife habitat complexes. This will enable the RIM-WRP partnership to restore approximately 375 previously drained wetland basins totaling 3,097 wetland acres, and adjacent native grassland complexes on approximately 6,288 acres.

### How will the outcomes be measured and evaluated?

An increase of wetland and associated native grassland habitat availability within a certain region are expected to increase the carrying capacity of wetland-dependent and grassland-dependent wildlife within that region. This would have a positive impact on both game

and nongame species. We expect more abundant populations of endangered, threatened, special concern and game species as these complexes are restored. Restored wetlands generally lead to an improvement in water quality in downstream receiving waters.

### Programs in prairie region:

- Expiring CRP lands are permanently protected
- Protected, restored, and enhanced shallow lakes and wetlands
- Water is kept on the land
- Past history indicates that approximately 80% of this protection and restoration of 60 wetland native grassland wildlife habitat complexes will occur in the LSOHC Prairie Landscape Section; 15% or 12 wetland native grassland complexes in the LSOHC Forest-Prairie Landscape Section; 5% or three wetland native grassland complexes in the Metro-Urbanizing L-SOHC Section.

#### How will the outcomes be measured and evaluated?

An increase of wetland and associated native grassland habitat availability within a certain region are expected to increase the carrying capacity of wetland-dependent and grassland-dependent wildlife within that region. This would have a positive impact on both game and nongame species. We expect more abundant populations of endangered, threatened, special concern and game species as these complexes are restored. Restored wetlands generally lead to an improvement in water quality in downstream receiving waters.

### **Budget Spreadsheet**

Final Budget line item reallocations are allowed up to 10% and do not need require an amendment to the Accomplishment Plan

Total Amount: \$13,810,000

### **Budget and Cash Leverage**

BudgetName	Request	Spent	Cash Leverage (anticipated)	Cash Leverage (received)	Leverage Source	Total (original)	Total (final)

Total	6.75	12.00	\$836,500	\$0		\$836,500

### **Explain any budget challenges or successes:**

Budget totals reflect last approved Accomplishment Plan Amendment (7/12/17). Rapidly escalating land costs forced a revision of the acre goals downward (via approved amendment) as price per acre increased. The demise of RIM-WRP led to 8 RIM Wetlands easements being funded only with LSOHC dollars only thus reducing leverage. Delays in restoration, partially due to federal contract processing delays, led to increased restoration costs. We received \$4,517,500 of federal leverage through this program.

All funds have been encumbered and all budget lines are reported as spent. Funds remaining after appropriation closeout will be returned.

All revenues received by the recipient that have been generated from activities on land with money from the OHF:

Total Revenue: \$0
Revenue Spent: \$0
Revenue Balance: \$0

### Explain the success/shortage of acre goals:

The end of the RIM-WRP Partnership, rapidly rising land costs and partner delays in easement processing and restoration work drove costs higher than originally proposed. Eight easements were funded via RIM only without WRP leverage due to changes in the Federal Farm Bill. A November 2014 Amendment reduced the acre goal to 3,841 acres. We met 88% of this revised acre goal. Due to LSOHC database architecture the ammended goals are not reflected in the "original" columns of this final report and one must refer to the 2014 Amendment for correct goals.
